Above are optimistic loads.

Densities: Pink, Yellow, Green, Blue, Red, Black, Orange (1966), Purple, Gold (tow), Silver (skim) - 8% weight reduction between colours.

Experience notes: Natural (moulded) rocker is shown. M08 is the most popular rocker in all sizes since 2008. One half inch thicker and two inches wider than usual to accommodate skating shapes and larger surfers. A very versatile blank for small waves.

Deep cutting may require heavier densities like Red or Orange Foam.
